EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Arne R. Jarnholm (Reg no. 30,396) on 1/10/2005.

The application has been amended as follows:

In claim 1, delete the word "on" in line 2 and replace it with --one--.

In claim 2, delete the word "thermoplastic" (occurs twice) in lines 1 and 2. Delete the words "of blend" in line 2. Add the word --thermoplastic-- between the words "amorphous" and "polymer" in line 4.

In claim 10, delete the word "on" in line 2 and replace it with --one--.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 2/27/2004 has been considered by the examiner. The second reference on the IDS was listed as US Patent Number 6,483,791. Upon reviewing this reference and the background section of the specification, the examiner has concluded that the second reference listed on the IDS was intended to be US Patent Number 6,483,971 as listed in the specification. The examiner has made the necessary correction to the IDS and has considered both references as they appear on the corrected IDS.

Allowable Subject Matter

3. Claims 1-11 are allowed.

Art Unit: 2883

4. The following is an examiner's statement of reasons for allowance:

5. Claims 1-11 are allowable over the prior art of record because the latter, either alone or in combination, does not disclose nor render obvious a buffer tube covering comprised of a blend of at least 40% by weight of a copolyether ester elastomer, at least 10% by weight of a rubbery modifier, and at least 10% by weight of an amorphous thermoplastic polymer, where the blend has a melting point of at least 165°C and a Trouser Tear Strength of less than 65 N/mm in combination with the rest of the claimed limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. *Simomichi et al (US 6,760,528 B2)* teach a covered optical fiber comprising a coating layer with an E Modulus of at least 200 MPa. Simomichi et al also teach that the coating layer comprises a thermoplastic polymer and an elastomer. *Norris et al (US 2003/0044139 A1)* teach a covered optical fiber comprising a coating layer that comprises polyethelene. Norris et al also teach that the coating has a Shore D hardness of at least 55. However, neither Simomichi et al nor Norris et al teach that either coating has the percentages by weight limitations of the claims.
